

CLEANING AND MAINTENANCE GUIDE VINYL AND STAINLESS STEEL SIGNAGE

Cleaning Materials Required:

- Soft Damp Cloth
- Warm soapy water
- Dry Cloth Towel

Cleaning Guide:

1. Using the Soft Damp Cloth
 - A. Dip the cloth in clean warm soapy water – wring dry.
 - B. Carefully wipe the sign, taking care not to rub away any of the braille lettering
 - C. Wipe the sign with the dry cloth to remove excess water, again taking care
 - D. Ensure your Cloth is cleaned between uses.
2. Do NOT use an abrasive cleaner or a stainless steel scourer as these will damage the signs. In cases where signs show extreme symptoms of wear and tear, a non-abrasive, noncorrosive commercial cleaning spray such as Mr Sheen can be used with care, although we do not recommend this is used on every occasion.

Metlam Signage should be subjected to a regular, controlled cleaning regime as described above. Metlam Australia takes no responsibility for any damage to walls or fixtures due to incorrect Cleaning or the use of incorrect cleaning materials.

The technical recommendations contained in this document are necessarily of a general nature and should not be relied upon for specific applications without first securing competent advice. Whilst Metlam Australia Pty Ltd has taken all reasonable steps to ensure the information contained herein is accurate and current, and in accordance with ASSDA recommendations, it does not warrant the accuracy or completeness of the information and does not accept liability for errors or omissions. Any Commercial product should only be installed by a competent tradesperson and serviced/maintained by knowledgeable janitorial staff or competent people. Metlam Australia accepts no responsibility for any damage to product, walls or fixtures due to incorrect installation or maintenance of any of their products.
